

Architect / Architectural Designer

Architects are 'the glue' of R+B! Architects and Architectural Designers are ultimately responsible for all drawings, documents, and specifications with specific attention to the technical design of the project. They perform at a high level and do not wait to be led.

Responsibilities

- + Provide and apply design options and vetting them thoroughly while actively engaging the project team and R+B leadership
- + Preparation of and ultimate success of the set of drawings and specifications using R+B standards (accurate, thorough, efficient, aesthetically pleasing graphics)
- + Technical accuracy, completeness and constructibility of the Construction Documents at all stages of development
- + Appropriate application and incorporation of building, zoning, energy, accessibility, and other relevant codes to all projects
- + Appropriate application and incorporation of recent and relevant building science and materials to all projects
- + Manage, coordinate, and serve as the primary point of contact of consultants, building agencies, and contractors
- + Generate and pick up redlines
- + Compile and submit permits

Qualifications

- + 7+ years of experience or demonstrated equivalence
- + Bachelor's degree in architecture or related degree from an accredited program
- + Exercises independent judgment in evaluation, selection, and use of standard techniques, solves typical and conventional problems when encountered, and receives guidance on unusual or complex design problems
- + Independently develops and documents project technical strategies, collateral, and deliverables under the supervision of more experienced staff
- + Proficient in Revit, AutoCAD, Photoshop, 3D modeling, rendering, SketchUp, Adobe Creative Suite, and Microsoft Office
- + Demonstrates familiarity with and understanding of contract terms and provisions, and is able to identify items outside of scope
